

Graph (Data)

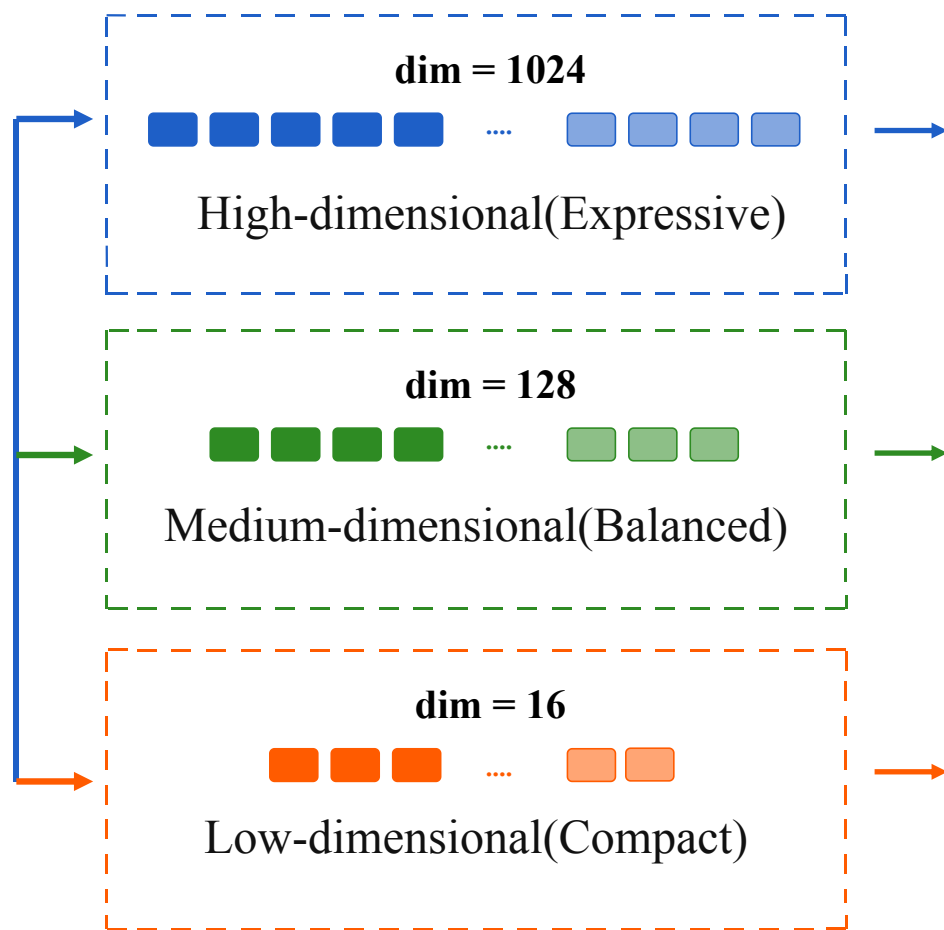

Complex Structural Relationships

- ✓ Rich topology
- ✓ High structural complexity
- ✓ Abundant information

Node Representations

Different Dimensions

Devices / Scenarios

Different Requirements

Cloud Servers

Offline Training,
Large-scale Analytics

- High accuracy requirement
- Abundant computation & memory

Edge Servers / PCs

Near-real-time Inference,
Edge Analytics

- Balance accuracy and efficiency
- Moderate computation & memory

Edge Devices / IoT

Real-time Prediction,
Latency-sensitive Applications

- Low latency requirement
- Limited computation & memory

Higher Expressiveness
Higher Cost

Lower Cost
Lower Latency
